

ESTIMATION OF LONG TERM STREAMFLOW
GENERATION FOR SUNGAI YAP WITH CLIMATE
ADAPTATION

FATIN NAQIYA BINTI ROSLAN

B. ENG (HONS.) CIVIL ENGINEERING

UNIVERSITI MALAYSIA PAHANG

SUPERVISOR's DECLARATION

I hereby declare that I have checked this thesis and in my opinion, this thesis is adequate in terms of scope and quality for the award of the Bachelor Degree of Civil Engineering

(Supervisor's Signature)

Full Name : Dr Nurul Nadrah Aqilah Binti Tukimat

Position : Senior Lecturer

Date : 11/01/2018

STUDENT'S DECLARATION

I hereby declare that the work in this thesis is based on my original work except for quotations and citations which have been duly acknowledged. I also declare that it has not been previously or concurrently submitted for any other degree at Universiti Malaysia Pahang or any other institutions.

(Student's Signature)

Full Name : FATIN NAQIYA ROSLAN

ID Number : AA14015

Date : 11/01/2018

ESTIMATON OF LONG TERM STREAMFLOW GENERATION FOR SUNGAI YAP WITH
CLIMATE ADAPTATION

FATIN NAQIYA ROSLAN

Thesis submitted in fulfillment of the requirements
for the award of the
Bachelor Degree in Civil Engineering

Faculty of Civil Engineering and Earth Resources
UNIVERSITI MALAYSIA PAHANG

JANUARY 2018

ACKNOWLEDGEMENTS

I am grateful and would like to express my sincere gratitude to my supervisor Dr Nurul Nadrah Aqilah Binti Tukimat for her germinal idea, invaluable guidance, continuous encouragement and constant support in making this research possible. She has always impressed me with her belief that a degree program is only a start of lifelong learning experience. I appreciate her consistent support from first day I applied to graduate program to these concluding moments' am truly grateful for her progressive vision about my training in engineering, her tolerance of my naïve mistakes, and her commitment to my future career. I also sincere thanks for the time spent proofreading and correcting my many mistakes.

My sincere thanks to all my teammates, who helped me a lots in my ways and made my stay at university Malaysia Pahang pleasant and unforgettable. Many special thanks go to member water and hydrology research group for their excellent cooperation, inspirations and support during this study.

I acknowledge my sincere indebtedness and gratitude to my parents for their love, dream and sacrifice throughout my life. I cannot find the appropriate word that could properly describe my appreciation for their devotion, support and faith in my ability to attains my goals. Special thanks should be given to my committee members would like to acknowledge their comments and suggestions, which was crucial for the successful completion of this study.

TABLE OF CONTENT

DECLARATION

TITLE PAGE

ACKNOWLEDGEMENTS	ii
ABSTRAK	iii
ABSTRACT	iv
TABLE OF CONTENT	v
LIST OF TABLES	vi
LIST OF FIGURES	ix
CHAPTER 1 INTRODUCTION	1
1.1 Background of Study	1
1.2 Problem Statement	3
1.3 Objective of Study	4
1.4 Scope of Study	4
1.5 Significant of study	5
CHAPTER 2 LITERATURE REVIEW	6
2.1 Introduction	6
2.1.1 Structural Flood Risk Management	8
2.1.2 Non-Structural Flood Risk Management	9
2.2 Forecasting of water Streamflow	10
2.2.1 Rational Method	11

2.2.2	Emphirical Method	12
2.2.3	Unit Hydrograph	13
2.2.4	Magintude and frequency method	14
2.3	Rainfall runoff Method	15
2.3.1	Physically Based Model	15
2.3.2	Conceptually Based Model	16
2.3.3	Metric Based Model	17
2.3.4	Hybrid Metric Conceptual	17
2.4	Identification Of Unit Hydrograph	19
2.5	Data Requirement IHACRES Rainfall Model	20
CHAPTER 3 METHODOLOGY		21
3.1	Introduction	21
3.2	IHACRES Model	24
3.3	Calibration and validation of IHACRES	25
3.4	Development Streamflow Equation	27
3.5	Description Of Study	21
CHAPTER 4 RESULTS AND DISCUSSION		30
4.1	Introduction	30
4.2	Calibrated And Validated Model Parameters In IHACRES	31
4.3	Calibrated And Validated Result In IHACRES	32
4.4	Performance of IHACRES Model	37
4.5	Development Of Streamflow Equation	40

CHAPTER 5 CONCLUSION	41
5.1 Introduction	41
5.1.1 To determine the reliability of the IHACRES model to generate the streamflow upstream Pahang River	43
5.1.2 To determine the best six parameters values for the long-term streamflow estimation at Yap river .	43
5.1.3 To develop a long term streamflow equations based on the six selected parameters.	44
5.2 Recommendation in future	45
REFERENCES	46

LIST OF TABLES

Table 2.1	Literature review of the study	18
Table 4.1	Calibrated model paramters value for IHACRES model	31
Table 2.1	Result of calibrated and validated process using IHACRES	32
Table 4.3	Statistical analysis of IHACRES model	34

LIST OF FIGURES

Figure 2.1	Method of flood control	8
Figure 2.2	Unit hydrograph	13
Figure 3.1	Flow Chart Of Research Methodology	21
Figure 3.2	The schematic diagram of ihacres	24
Figure 3.3	Basic concept of runoff model by ihacres	26
Figure 3.5	The map of Pahang river	29
Figure 4.1	Calibrated (Jan 2000 –Jan 2001) and validated Apr 2001-Dec 2001) result of IHACRES model	33
Figure 4.2	Percentages error of the streamflow	37
